

Sr No	Patent Title	Patent Number / Application No.	Publication Date	Inventor(s)	Assignee / Applicant	Abstract / Summary	IPC / CPC Code	Status	Country / Jurisdiction	Claims	Relevance to Your Work
1	Vaccination Status Identification Card	US 2024/0404665 A1 (App. 18/800,931)	2024-12-05	Tonya Smith	Tonya Smith	System/card to display an individual's vaccine status via a machine-readable ID card.	G16H 10/65; G16H 20/00	Pending	US	ID card encoding of vaccination history.	Helpful for offline verification and integration with field workflows.
2	Method and system for providing certification of vaccine inoculation and post-inoculation management	US 2024/0185994 A1	2024-06-06	Yong Tae Kim; Jee Yong Um; Byung Wan Lim	Blockchain Labs Inc.	Digital vaccine certificates plus post-shot monitoring; QR/barcode scanning of vaccine data.	G16H 10/60; G16H 20/10; G06Q 50/26; G16H 40/67; G16H 70/40	Pending	US (Family includes KR/WO)	Tamper-resistant QR certificates tied to inoculation.	Aligns with QR-based certificate systems and post-injection tracking.
3	Medication info management system (incl. vaccines)	US 2024/0013880 A1	2024-01-11	Yoichi Sakurai; Takeru Umeda; Ryuta Kokubo	NTT Communications Corp.	Platform for medication records—including vaccination—and token-based access.	G16H 20/10; G06Q 50/26; G16H 10/60; G16H 40/67; G16H 70/40	Pending	US (JP priority)	Issuing verification tokens tied to administration events.	Good model for tokenized EHR/IIS-level vaccination tracking.
4	Vaccination record management systems	WO 2025/095979 A1	2025	—	(Assignee unspecified)	Cloud-based system with user device and portal for managing vaccination records.	—	Application	WIPO (PCT)	Cloud-based vaccination data capture and sync.	Useful for designing scalable cloud-based record repositories.
5	End-to-end vaccine delivery system & tracking	US 2022/0092529 A1	2022	—	—	Cold-chain monitoring system from manufacturer to patient with sensor-equipped cold boxes.	—	Application	US	Sensor-integrated cold boxes for tamper-evident transport.	Crucial for ensuring safe transport to clinics, with audit trail.
6	Centralized system for vaccination tracking and verification	US 2022/0328174 A1	2022	—	—	Central control server for vaccination records, anonymized proof, inventory monitoring, and reporting.	—	Application	US	Control server with verification, inventory, reports, privacy modules.	Useful for connecting vaccination verification to supply/inventory control.
7	Smart Vaccination Management System	CN 201810896668.7A (CN110826654A)	2018	—	—	System with warehouse and vaccination terminals, data center; scans, traces vaccine quantity, temperature, and real-time data.	—	Application	China	Terminal-based scanning of storage/movement and temperature logging.	A good example of station-level digital management and real-time cold-chain data.

Sr No	Patent Title	Patent Number / Application No.	Publication Date	Inventor(s)	Assignee / Applicant	Abstract / Summary	IPC / CPC Code	Status	Country / Jurisdiction	Claims	Relevance to Your Work
8	Method & system for tracking and monitoring vaccine environmental info	US 8,332,240 B1	2012	—	—	Monitors vaccine status via tagged info and environment sensors; checks expiration and exposure.	—	Granted	US	Tag-based environmental monitoring (expiration, temperature).	Excellent precedent for IoT based vaccine storage integrity tracking.
